

Change of Major and Change of College

Current UCSB students in a non-engineering major, as well as students wishing to change from one engineering major to Mechanical Engineering, will be considered after the satisfactory completion of a pre-defined set of coursework (see below).

Students who have completed more than 105 units will not be considered for a change of major in engineering.

Before petitioning for a change of major to Mechanical Engineering, a minimum of six (6) of the following core courses or their UC equivalents must be completed. Acceptance into the major will be based on UC grade point averages* and applicable courses completed.

*The calculation of the core course GPA will be based on all classes completed from this list at the time of petitioning.
